PRODUCT INFORMATION

CONTENTS

Recombinant Mouse gAcrp30 (Carrier-free)

DESCRIPTION

gAcrp30 or globular adiponectin, is a globular protein proteolytically cleaved from adiponectin. It is expressed exclusively by differentiated adipocytes and is present in circulating plasma. gAcrp30 enhances fatty acid oxidation in muscle which may lead to weight loss. Low plasma levels of this protein are associated with insulin resistance and obesity. gAcrp30 and Adiponectin signal through the AdipoR1 and AdipoR2 receptors.

MOLECULAR MASS

Recombinant Mouse gAcrp30 consists of 145 amino acids and has a molecular weight of 16.6 kDa.
