

TECHNICAL DATA SHEET

PE Anti-Mouse CD223 (LAG-3) (C9B7W)

Catalog Number: 50-2231

PRODUCT INFORMATION

Contents: PE Anti-Mouse CD223 (LAG-3) (C9B7W)

Isotype: Rat IgG1, kappa

Concentration: 0.2 mg/mL

Clone: C9B7W

Reactivity: Mouse

Use By: 12 months from date of receipt

Storage Conditions: 2-8°C protected from light

Formulation: 10 mM NaH₂PO₄, 150 mM NaCl, 0.09% NaN₃, 0.1% gelatin, pH7.2

C57Bl/6 splenocytes stimulated for 3 days with ConA and then stained with APC Anti-Mouse CD3 (20-0031) and 0.5 ug PE Anti-Mouse CD223 (LAG-3) (50-2231) (right panel) or 0.5 ug PE Rat IgG1 isotype control (left panel).

DESCRIPTION

The C9B7W monoclonal antibody reacts with mouse CD223, also known as Lymphocyte-activation gene 3 (LAG3). CD223 is a 70 kDa member of the Ig superfamily and is structurally homologous to CD4. Like CD4, CD223 binds to MHC Class II but with higher affinity than CD4. CD223 is expressed on T cells activated through the T cell receptor and on activated NK cells.

PREPARATION & STORAGE

This monoclonal antibody was purified from tissue culture supernatant via affinity chromatography. The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation. It is recommended to store the product undiluted at 4°C, and protected from prolonged exposure to light. Do not freeze.

APPLICATION NOTES

This antibody preparation has been quality-tested for flow cytometry using mouse spleen cells, or an appropriate cell type (where indicated). Please refer to the figure legend for the optimal concentration used to stain the tissue shown. We recommend titrating the antibody under your specific conditions to determine the optimal concentration of antibody needed in your experimental system.
